

Hi Everyone,

It was seeing the children today (it seems like it has been a REALLY long time!). :)

We had a nice class today learning about Sukkot, the lulav and etrog and practicing Hebrew. We will be starting in our Hebrew book after Simchat Torah. We made Sukkah decorations either to take home, or to donate to the shul's sukkah. :)

****Please remember to practice Hebrew letter recognition with your child (see the homework folder in their backpacks!!). ****

Thank you to parents for remembering snacks and water bottles, and tzedakah each class.

Remember no school on Sunday for Sukkot, but please plan to join us for services (Shabbat clothing is appropriate) and a children's program with Rabbi Shalva at 9:30 in Social Hall 2. After that, I will be doing a children's program (with snack) from 10:15-11:00.

Chag Samayach!

Nechama

There is a **homework folder** in your child's backpack (if they were in school today) with homework and the Teshuvah card. (if there is no card, then your child chose to write one to me). :) Please **practice with your child 2 times per week for 5-10 minutes** on letter recognition (they need to know the sound the letter makes more than the name of the letter - if you need help with that, email me and I will send a cheat sheet!) We have not started final letters yet.

- PLEASE remember to send a **snack and water bottle each day** so we don't starve!
- Please keep a **sweater** in your child's backpack as our room is either HOT or FREEZING (nothing in between!).
- Please remember **all books, a notebook and pencils**.
- **Tzedakah** everyday!!

Interesting Facts about Israel:

The cell phone was developed in Israel by Motorola, which has its largest development center in Israel.

Voice mail technology was developed in Israel.
